

Close-up: Ladybird Beetle Leg Adhesive Pad

[1] This 20x image of an adhesive pad on a foreleg of a ladybird beetle (*Coccinella septempunctata*) won seventh place in the 2013 Nikon Small World Photomicrophotography Competition. It was taken by Dr. Jan Michels of the Institute of Zoology, Functional Morphology and Biomechanics, Christian-Albrechts-Universität zu Kiel, in Kiel, Germany, using confocal microscopy and autofluorescence.
